BRODY SCHOOL OF MEDICINE	Office of Student Affairs Division of Academic Affairs Brody School of Medicine East Carolina University	SOP #	12.8.1
		Version #	1
		Implementation Date	12/8/2021
Heading:	Student Exposure/Blood Borne Pathogen Occupational Exposure	Last Reviewed/Update Date	12/8/2021
		Approval by ECC	12/8/2021

## SOP Title: Student Exposure

## Rationale

Training for care of patients and delivery of patient care necessitates encounters with patients who have communicable diseases. Brody School of Medicine (BSOM) should educate students to be as protected as possible against the transmission of blood borne pathogens (BBP) and other highly contagious disease (i.e., Tuberculosis, COVID) exposures, and identify the steps students are to follow should there be a potential exposure.

#### Scope

#### **Brody School of Medicine Courses and Clinical Experiences**

This Standard Operating Procedure (SOP) applies to all BSOM students and applies to blood borne pathogen and other highly contagious disease exposures both inside and outside of BSOM Clinics and the spaces of our clinical partner the Vidant Medical Center. Students at other sites are expected to follow the exposure procedures at those sites.

#### **Responsibilities**

**ECU Prospective Health:** Provide mandatory training sessions for each Brody Student via yearly orientation sessions, which are required prior to student entry into any educational space. The purpose of each session is to educate students on access to resources, the effects of infections and environmental diseases, methods of prevention, and protocols in the event of a BBP or other highly contagious disease exposure.

BSOM Students: Complete and document training annually.

Students should refer to this procedure to document the time and location of their potential exposure and to determine who their first point of contact should be.

Depending on the timing and location of the exposure, students should contact either an ECU attending physician or head nurse, the nursing coordinator, Occupational Health at Vidant, or ECU Prospective Health. The steps are outlined in this SOP and a brief summary provided in a Student Exposure Card included as an appendix to this SOP.

The student has financial responsibility for care and treatment which is covered by the required student health insurance. In addition to the student health insurance, costs for the care and treatment are covered by Student Health and Prospective Health as outlined in the SOP.

**BSOM Office of Student Affairs (OSA)**: Assist ECU Prospective Health in their annual collection of confidential M1 BBP information and document vaccination data as each new cohort of

students enter into BSOM, as well as facilitate student understanding of the current policy if requested. OSA is also responsible for the annual tracking of student compliance, insuring the attendance at annual training prior to entry into educational setting.

## Procedures for Implementation and Review

Student exposures can broadly be classified as 1) blood borne pathogen exposures and 2) exposures to other highly contagious diseases.

# **Required annual training:**

All students must complete the blood borne pathogen safety and exposure training annually. The training is organized by the Office of Student Affairs and provided by the Office of Prospective Health. Records verifying completion are maintained in the Office of Student Affairs.

Training includes completion of a Blood Borne Pathogen module, a module on respiratory diseases and N-95 mask fit testing.

## Steps to be taken following exposure:

If students have been in contact with blood, infectious body fluid, serum, or unfixed tissue, including contact that occurs via sharps stick, cut or splash onto mucous membrane or non-intact skin, a blood borne pathogen exposure has occurred.

Exposure occurred during regular work hours (8am-5pm):

- 1. Exposure occurred at Vidant:
  - a. Contact Occupational Health at Vidant for source patient workup (847-0095).
  - b. Contact ECU Prospective Health (744-2010- or 744-3545)
  - c. Have surveillance or treatment as needed, including HIV prophylaxis as soon as possible if indicated.
  - d. Follow in conjunction with ID if PEP given x1 month surveillance x 6 months.
- 2. Exposure did not occur at Vidant:
  - a. Contact ECU Prospective Health (744-2010- or 744-3545).
  - b. Have surveillance or treatment as needed, including HIV prophylaxis as soon as possible if indicated.
  - c. Follow in conjunction with Infectious Diseases (ID) if Post Exposure Prophylaxis (PEP) is given x1 month surveillance x 6 months.

Exposure occurred outside of regular work hours:

		Approval by ECC	12/8/2021

- 3. Exposure occurred at Vidant:
  - a. Contact nursing coordinator for risk assessment for HIV risk.
  - b. If no HIV risk is indicated, contact Prospective Health during work hours for follow-up/surveillance.
    - i. Have surveillance or treatment as needed, including HIV prophylaxis as soon as possible if indicated.
    - ii. Follow in conjunction with Infectious Diseases (ID) if Post Exposure Prophylaxis (PEP) is given x1 month surveillance x 6 months.
  - c. If HIV risk is determined to exist, medical student may be referred to Emergency Department (ED) for post exposure prophylaxis as soon as possible if indicated.
    - i. Phone consult with Infectious Diseases regarding need for post exposure prophylaxis (PEP).
    - ii. If PEP is needed, have metabolic panel, CBC and diff, as well as pregnancy test in ED.
    - iii. ED obtains consent, sends prescription to pharmacy, and sends bill to ECU Workers Comp, care of Donna Davis.
    - iv. Schedule follow-up at ECU Prospective Health.
    - v. Follow in conjunction with ID if PEP given x1 month surveillance x 6 months.
    - vi. Contact ECU Prospective Health (744-2010- or 744-3545) during work hours for follow-up/surveillance.
    - vii. Have surveillance or treatment as needed, including HIV prophylaxis as soon as possible if indicated.
    - viii. Follow in conjunction with ID if PEP given x1 month surveillance x 6 months.
- 4. Exposure did not occur at Vidant.
  - a. ECU attending physician or head nurse reviews patient chart and completes risk assessment per appendix "D" ECU Infection Control Policy.
  - b. If the source has a history of HIV or risk factors, the medical student should be referred to ED for post exposure prophylaxis.
  - c. Phone consult with Infectious Diseases regarding need for post exposure prophylaxis (PEP).
  - d. If PEP is needed, have metabolic panel, CBC and diff, as well as pregnancy test in ED.
  - e. ED obtains consent, sends prescription to pharmacy, and sends bill to ECU Workers Comp.
  - f. Schedule follow-up at ECU Prospective Health.
  - g. Follow in conjunction with ID if PEP given x1 month surveillance x 6 months.
  - h. Contact ECU Prospective Health (744-2010- or 744-3545) during work hours for follow-up/surveillance.

- i. Have surveillance or treatment as needed, including HIV prophylaxis as soon as possible if indicated.
- j. Follow in conjunction with ID if PEP given x1 month surveillance x 6 months.

<u>Responsibility for costs of treatment for Blood-Borne Pathogen and other Highly Contagious</u> <u>Disease Exposure</u>

Students are ultimately responsible for all medical costs related to blood-borne pathogen and other highly contagious disease exposure. Costs related to testing and diagnosis are covered by the required student health insurance, supplemented by the services of the Office of Prospective Health and by Student Health.

## **Return to Educational Activities after Exposure**

Students should notify the Office of Student Affairs immediately regarding an exposure or illness. Student Affairs will work with the student to notify course and clerkship directors that the absence is excused. Absences for testing and treatment are absences for healthcare appointments/personal illness, governed by the BSOM Student Attendance Policy. Student return to educational activities following an exposure or illness will be based on current professional (CDC) guidelines.

It is a code of conduct violation for students to attend any in person class or campus event while they are in isolation or quarantine. The ECU Student Health Services can help determine when the criteria for ending quarantine and resuming regular activities has been met.
