**Course Description**
This course will expose 4th year medical students to combined internal medicine and psychiatry at ECU with a focus on integration of psychiatric and medical principles for comprehensive care.

**Course Objectives**
- Describe and discuss overlap and co-morbidity of medical and psychiatric disorders
- Improve assessment and diagnosis of both psychiatric and medical disorders.
- Discuss formulation of treatment plans for psychiatric and medical disorders within individual patients with co-morbidities.

**Course Activities**
Students will attend didactic sessions for both Psychiatry and Medicine, as well as Grand Rounds for both Internal Medicine and Psychiatry. Students will receive formative midterm feedback from the respective site director.

**Course Schedule Requirements**
General schedule will be on-call, up until 8:00 pm
