<th>Course Goal(s)</th>
<th>Introduction to and overview of Outpatient Rehabilitation Medicine</th>
</tr>
</thead>
</table>
| Educational Objectives | By the end of the rotation, students should have an understanding of the following:  
1. The scope of practice in Physical Medicine and Rehabilitation in an outpatient setting  
2. The use of function-based approach to patient care and how medical illnesses and injuries affect an individual’s ability to function in society.  
3. The interdisciplinary team approach used in rehabilitation and the role of each member  
4. The appropriate prescription of allied health services as well as therapeutic exercise program |
| Course Readings | The following source material will be used; assignments will be individualized  
• The 3 Minute Musculoskeletal and Peripheral Nervous System Examination by Allan Miller |
| Course Activities/Experience |  
• Student will work directly under supervision of PM&R faculty and resident physicians in the rehabilitation outpatient centers  
• Student will actively participate in patient evaluation and management, including presentation of patients to supervisory attending physicians  
• Student will rotate in variety of PM&R outpatient clinics including general rehabilitation (stroke and orthopedics), amputee, spinal cord injury, traumatic brain injury, pediatric, occupational medicine, chronic pain, wheelchair/equipment, spasticity, Botox injections, nerve injections (Phenol), Baclofen pump, Acupuncture, Wound Care/Hyperbaric Medicine, and electrodiagnostics (EMG’s)  
• Student will participate/interact with allied health professionals including physical therapy, occupational therapy, and speech-language therapy  
• Review all potential current PM&R Research activities |
| On Call Requirements | None |
| Student Performance & Assessment |  
• Completed on ECU Brody SOM Medical Student Evaluation form  
• Observation & grading of performance of functional examination  
• Participation in clinical activities (performance ratings)  
• Participation in didactic & other educational sessions/activities  
• Final course grades will not be released until all course requirements (including evaluation forms) are completed  
• Patient care hours are generally 8:00am to 5:00pm, but will be individualized to schedules of attending physicians and care activities |
