### Course Goal(s)
To obtain broad exposure to the exciting field of Plastic and Reconstructive Surgery

### Educational Objectives
To become knowledgeable and comfortable with evaluation, management and treatment of:
- Wounds, wound healing
- Reconstruction with grafts and flaps
- Reconstruction and aesthetic surgery of the breast
- Hand/upper extremity surgery
- Facial trauma
- Lower extremities trauma
- Congenital anomalies
- Body contouring and aesthetic surgery

### Course Readings
The student will become an integral part of the Plastic Surgery team. The student will be expected to take part in all clinical activities on the plastic surgery service including a broad operative experience, surgical clinics, and rounds and formal lectures. Opportunity for independent research projects are encouraged, but are not required. Night/Weekend home call will be scheduled at the beginning of the rotation.

### On Call Requirements
- Clinical Evaluation (Knowledge/Skills/Case Write-ups)
- Participation (attendance of rounds, clinics, OR)
- Professionalism
- Given the short duration of the rotation (14 days) attendance of a minimum of 10 days will be required for evaluation and completion of the rotation.
