

Course Description	The Acting Internship (AI) is a comprehensive clinical experience designed to provide the student with increased responsibilities for the assessment and management of patients. Students are integrated into the health care team and will have primary responsibility for the patient's care under close supervision. The Acting Intern will experience the roles and responsibilities of an intern on the team. This AI will increase the student's knowledge of ambulatory pediatric problems, help students gain an awareness of the role of the primary care pediatrician as coordinator of care and advocate for patients, and learn the scope of community services available for patients.
Course Objectives	<ul style="list-style-type: none">• Identify and manage common pediatric problems• Describe the breadth and scope of services available to pediatric patients in the community• Explain concepts of health maintenance and disease prevention including anticipatory guidance• Explain concepts of continuity of care
Course Activities	Students in this course will be responsible for seeing pediatric patients in a clinical setting.
Course Schedule Requirements	Students are expected to be available during evenings and weekends for after-hours clinic. Students will take 6-8 calls/month in the night clinic from 6:00-9:00 pm.
